About Me

Hi, I'm Erika! I'm a front-end web developer with 6+ years of professional experience in full-stack development with a strong focus on the front-end.

I have experience and am comfortable working in React, Svelte, Vue, and TypeScript as well as multiple back-end technologies such as Node/Express, Laravel, and Ruby on Rails. Development is my passion and I'm always striving to learn more and stay up-to-date in the constantly shifting web development world.

I've worked with multiple companies to modernize legacy codebases and helped build and many web apps of all sizes.

Work Experience

Full Stack Engineer

Freelance

06/2020 - Present

- Work closely with clients to figure out their needs and use that info to create highly tailored app or website

Front End Engineer

FreightWaves, Inc.

12/2019 - 07/2020

- Fix bugs and add features to Sonar front-end
- Help with a Vue rewrite of core components of Sonar
- Work closely with data science and back-end team to create new features

Full Stack Engineer

Video Ideas Productions / PointsMap LLC

03/2018 - 12/2019

- Maintain many in-house and client applications
- Server maintenance
- Redesign and migrate their existing PointMap app from Ionic v1 to a progressive web app written in React
- Work closely with clients to create web and mobile apps based on their specific needs
